TECHNOLOGICAL FORECASTING AND SOCIAL CHANGE 40, 395–396 (1991)

Subject Index—Volume 40

Agricultural research
  Green revolution and, 235
  knowledge production measurement in, 249
Allocation mentality, 297

Berlin wall, 289
Bribery, 297

California 1980 medfly eradication program, 1
Canadian manufacturing, computer-based technologies and, 371
Causal loop analysis, social aftereffects in East Europe and, 297
Computer-based technology
  Canadian manufacturing and, 371
  training and application of, 371
Computers
  massively parallel computers, 315
  minisupercomputers, 315
  supercomputers, 315
Corporate minds, crisis management and, 33
Cost forecasting, nuclear, 103
Cost–benefit analysis process
  decision making and, 53
  expenditures and, 53
  Social Security Administration and, 53
Crisis management, organizational mind and, 33
Cross-cueing, 1
Customer coconstruction
  process promotion and, 261
  product innovation life cycle and, 261
  product/service markets and, 261
  risk sharing and, 261

Decision making
  cost–benefit analysis process and, 53
  Delphi method and, 131, 151
  foresight studies and, 223
  nonroutine conditions and, 1
  scenarios-based planning and, 73
Delphi method
  human judgment and, 131
  nuclear energy policy issues and, 151
  technology forecasting approach with semi-Markov concept, 273
Dependism, 297
Desert Storm, 303

Eastern Europe
  free market system and, 297
  interlocking practices and, 297
  social aftereffects and, 297
Environmental problems, sources of 21st-century, 87
Expenditures, cost–benefit analysis and smaller, 53
Expert systems, technology integration and, 165

Fears, technological change and human, 355
Foresight studies, decision making with, 223
Free market system, Eastern Europe and, 297
Future, visioning and, 73
Futures studies, Kahn, Herman and, 289

Germany, futures studies in, 289
Government and regulatory matters, nuclear power future and, 151
Great Britain, technological leadership and, 213
Green revolution
  agricultural research and, 235
  technological change as problem-solving activity and, 235
Gulf crisis
  future military operations and, 303
  Kuwait and technology transfer, 183

Human fears, technological change and, 355
Human judgment, Delphi methods and, 131
Human rights, science, and technology, 389

Interlocking practices, Eastern Europe and, 297

Judgment methods, human, 131

Kahn, Herman, futures studies in Germany and, 289
Knowledge production
  agricultural research system and measurement of, 249
  research input–outout relationships and, 249
Knowledge systems, technology integration and, 165
Kuwait
  research and development institutions in pre-August 1990, 183
  technology transfer and pre-August 1990, 183

Leveraged bonus, 297

Man-made crises, 33
Massively parallel computers, supercomputers versus, 315
Medfly problem, 1
Mental processes, organizational mind and, 33
Military operations, Desert Storm and future, 303
Minisupercomputers, supercomputers versus, 315
Model-base centered planning support systems, 329
Multiple perspectives research methodology, technology integration and, 165

Netherlands, The, anticipatory policy making in, 223
Nonroutine conditions, decision making under, 1
Nuclear cost forecasting, 103
Nuclear energy policy issues, Delphi method and, 151
Nuclear power
  future in United States, 151
  government and regulatory matters with, 151

Organizational mind
  crisis management and, 33
  mental processes and, 33
Organizational theory, model-base centered planning support systems and, 329

Planning support systems, model-base centered, 329
Policy making, The Netherlands and anticipatory, 223
Problem solving, technological change and, 235
Process promotion, customer coconstruction and, 261
Product innovation life cycle, customer coconstruction and, 261
Product/service markets, customer coconstruction and, 261
Psychographic profile, 33

Regulatory decisions, cost–benefit analysis process and, 53
Research and development
  Kuwait and, 183
  scenarios and, 73
Research input–output relationships, knowledge production and, 249
Risk sharing, customer coconstruction and, 261

Scenarios-based planning
  decision making and, 73
  research and development and, 73
  Statoil and, 73
Science, human rights and, 389
Semi-Markov concept, Delphi technology forecasting approach with, 273
Sequential process, 1
Social aftereffects, Eastern Europe and, 297
Social Security Administration, cost–benefit analysis process and, 53
Social theory, nuclear cost forecasting and, 103
Social transformation, USSR and, 189
Soviet Union, social transformation in, 189
Statoil, scenarios-based planning and, 73
Supercomputer architecture, 315

Technological change
  Green revolution and, 235
  human fears and, 355
  problem solving and, 235
Technological development, anticipatory policy making in the Netherlands for, 223
Technological leadership
  Great Britain and, 213
  United States and, 213
Technology
  computer based, 371
  human rights and, 389
Technology development, technology forecasting and, 273
Technology forecasting
  Delphi approach with semi-Markov concept in, 273
  technology development and, 273
Technology integration
  expert systems and, 165
  knowledge systems and, 165
  multiple perspectives research methodology and, 165
Technology management, 165
Technology transfer, Kuwait and, 183
Telecommunications industry, human fears of technological change in, 355

USSR, social transformation in, 189

Visioning, future and, 73
